

# Join us / REVIT **Structural Drafter**

## **McVeigh Consultants is an integrated engineering and architectural design practice.**

We have been established for over 20 years and operate from bright contemporary offices in inner city Newstead. We have been steadily growing, even in recent times, and have a solid future workload in the pipeline.

McVeigh Consultants has a ISO9001:2008 externally audited Quality Management System in place and has a Queensland State Government Pre-Qualification Classification of PQC 4.

We are currently providing services to the retail, industrial, residential, education and commercial markets. We also provide services to the land development industry and are looking to explore further opportunities in mining and infrastructure.

Our integrated teams consist of engineers, architects and technicians all working seamlessly together to provide our clients with a service that is unique in the marketplace. Our integrated design business model means that our engineers do not face frustrating delays or re-work waiting for outside consultants to provide base information for our work to proceed.

July 2010 / McVeigh Consultants Pty Ltd [www.mcveigh.com.au](http://www.mcveigh.com.au)

# McVeigh

We now have an opportunity for a REVIT Structural Drafter to join one of our integrated teams. This position will work in an integrated team of drafters, engineers and architects and will be responsible completing structural engineering drawings for a wide range of project types, including residential, commercial, retail, industrial and education. You will contribute to standards and drafting resources. You will help train and mentor bright young members of our team in REVIT, AutoCAD and drafting standards and become a key member of our growing team.

Ideally you will have 5 to 10 years experience, although exceptional candidates with lesser experience are encouraged to apply. You will need very strong REVIT expertise with significant technical construction experience and a good understanding of how buildings fit together. Ideally you will have experience in an integrated team environment and be able to co-ordinate your work with that of other disciplines. You will have relevant industry qualifications.

When you join our team you will enjoy working in a bright modern office with a great energetic team. You will enjoy a close working relationship with your team leader. You will receive significant training in areas of interest to you and that will benefit the firm. You will be paid well for your contribution to our activities.

Attention to detail, 'systems thinking', a healthy sense of humour and a positive can-do attitude are a must!

We offer a generous training budget and the opportunity to work on a range of different projects.

**We are very keen to fill this role. If this sounds like you, please contact us immediately!**
