Senior Associate Structural Engineer

McVeigh Consultants is an integrated architectural and engineering firm providing design and project management services for urban development, building and infrastructure projects.

We are typically appointed as lead consultants or project managers on our client's projects. Information and design decisions flow smoothly, no frustrating delays or re-work due to outside influences, just work with your fellow team members to resolve all design issues.

We use the latest design and modelling software including REVIT, SLABS, RC Building, RAPT, Microstran, Limcon, FEAR.

Our core values are simple, our people enjoy their work, work as teams on great projects for good clients and add value to their own lives, our client's projects and our business.

We currently have an opportunity for a Senior Associate Structural Engineer to join our growing team and take over the Engineering function from our Managing Director.

The person we are looking for will have 15+ years post graduate experience in structural engineering, with RPEQ accreditation.

A typical working week will involve: schematic design development, value engineering, detailed design calculations, site inspections, construction support, RFI responses, day to day liaison with clients, design management, external and internal team members and working within our integrated team as the Senior Associate Structural Engineer in a technical and mentoring role, reporting directly to the Managing Director.

When you join our team you will be working in a bright, modern office with a great team. You will enjoy a close working relationship with our Managing Director and will be challenged to attain professional and personal growth.

Must haves:

- Multi-rise and post-tensioned concrete experience**
- Advanced structural design skills including: reinforced concrete and post-tensioned concrete**
- Structural analysis and design software skills including RAPT**

You will be paid well for your contribution to our activities and will receive a significant training allowance in addition to your salary package.

Skills and experience are important, but a fit between individuals and our organisation is our No.1 selection criteria.

If this sounds like you, please contact us immediately!
